

BUSINESS NORTH CAROLINA's list of the state's best hospitals with 50 or more beds examines data compiled from several sources to determine which medical centers provide the best care for their patients.

The rankings are calculated using more than 25 metrics, including information provided by the U.S. Centers for Medicare & Medicaid Services. Patient-satisfaction surveys, as well as infection, readmission and death rates for common procedures, are also taken under consideration.

Other factors include safety report cards by the Washington, D.C.-based nonprofit The LeapfrogGroup, distinction awards from insurer Blue Cross and Blue Shield, and national performance ratings from *U.S. News & World Report*.
